Square enix software token reset

By Apsilon on 2020/12/13 01:05 just seems some suggestions are very easy for people to get insurance from their accounts if not careful. Pushauthentication will be a useful update. Maybe link user SQEX acct. by Mega Norak son on 2020/10/28 22:33 Activation this token was the biggest mistake I've ever made, I'm now just locked out of my account because that one-time password is now asking for one I can't give, customer service doesn't care enough to fix the problem, mainly expected to pay for the game and all expansions again Just to be able to play again, all that progresses and time spent, subscription fee paid, means something, if you even think for a second that this code is a good idea, STOP, do not throw away hundreds of dollars for a security feature broken by aroniehus on 2020/10/24 21:15 I've been putting in all the correct information and it's actually trying to tell me otherwise. How do I know it's the right information? Because I logged out of my enid box account and logged back in with the same information this app tells me I have an error. By the sun fall on 2020/10/13 05:54 very frustrating and uncomfortable. Stick to what you're good at in the yard. By TKSuperTurbo on 2020/08/29 16:09 Just hit the agreement on the top left and you're good! By UnklDude on 2020/08/01 20:24 I don't know what it's all whining about. This app is perfect for the simple thing that it is. And for all people who have problems in knowing how to agree to terms and conditions, and open your eyes, it is very starkly clear: press the word consensus in the upper left corner. I love this app because I no longer need to use this security token that I bought during the final fantasy twelfth gameplay. The old security code is not bright and needs a decent light source in order to read the numbers displayed on the small screen. With the app, the screen is illuminated by backlit and the numbers are bigger and easier to read. I downloaded this app when it first came out but just got around to actually record it about 2 to 3 weeks ago. I'm so glad I'm no longer using the facebook security key. I wish I had recorded it when I downloaded it and tossed out the FOB key. By Fallen556 on 2020/07/26 04:51 I would love to see this app available on the Apple Watch. Follow the instructions associated with this app, which is flawless. There are no issues to report on 07 by ArtOfLostar on 2020/07/19 18:32 Please add iPad support. By YukiNeko_Sai on 2020/07/13 00:39 I was a little worried at first because of all the low ratings. I'm glad I chose to give this a try though. It works well. This app does what you're supposed to do. I didn't come across any problems at all, so I'm giving this a 5 star rating. :) By SliceOfLife - on 2020/06/09 14:58 and watch the app. outdated compared to other beadings. Not to mention FFXIV is a general outdated. By JC_Ron on 2020/06/08 10:48 so, basically the problem with the security code is that if you lose your phone or damaged. Besides, To get a new phone, there's no way to sign in to square Enix's account to get your registration password to use the app if you only have one phone per account. It's a terrible idea to make every relevant login you must enter a password one time in order to continue. Can't use a damaged phone, and how can someone access their accounts if they can't sign in to their account manager because of one password required? The problem is that customer support is not always available, especially on weekends. Email can take 3 to 24 hours to respond. It's really boring that it's not likely that customer support can only help one turn into something like that because they usually just throw Q/A copies and expect people to do what is actually prompted. It's really a circle about how you should log into your account in order to change something. Really stupid ideas, that said why it is possible to send only to the registered email for any recovery information if someone forgot or lost their passwords by accident. Do you think hackers can just take a registered email so easily? I'm really disappointed with how the box handled account recovery and password recovery. The security code is actually in that middle mess that can only be helped by customer support with regular schedule and long waitresponses. By OfficialChanaya on 2020/05/03 18:58 It's great by niciosiny on 2020/05/03 16:10 please add apple watch support, please pretty. By Link86_1 on 2020/04/24 23:04 The app is Garbage. There is no backup function. There is also no mention of the type of emergency restore code that is locked within your account. Don't use or risk accessing your account permanently. Can't get ahold from customer service either. Everyone was fired because of the epidemic which is outrageous because the business will only increase for a toy company during the epidemic. By Sephirah on 2020/04/21 20:19 Fully Functional, needs an Apple Watch component. I often sit down to play and then think, crap, Gotta get my phone, I wish this was on my watch! By antic92 on 2020/04/12 16:18 I heard some friends were playing ffa so I wanted to give it a shot. I was amazed at the amount of hoops required to start this game. Not only does it force you to download this app in the name of security but the app, as many people have complained, makes it impossible to find an acceptance button. We all know that they are just trying to steal and sell your data by downloading this app. Not only did I download the game, I uninstall the app quickly. By Robliminal on 2020/02/13 18:24 FFXI played for five years when he came out. I stopped, then tried the fourteenth trial in 2017. I haven't logged into my Square Enix account for three years, and now when I try to log in, ask for a one-time password. So I downloaded this app again and asks me to enter the registration code I found in my SE account that I can not get into the reason I need a one-time password. I'm supporting email and those idiots just send me the same Response. Unfortunately, the information in this email does not check the account. All right. I guess they don't need to work anymore their servers seem to be overflowing. By purrdeta on 2019/12/28 19:33 so it took me forever to realize that the acceptance button is at the top left on the iPhone XS. Do not stand out in any way, and actually seem to be part of the title page. By NavikVonB on 2019/12/20 18:23 Thanks to other reviews I knew that the acceptance buttons and Ok were text in the top left. Make this intuitive and you give these 5 stars. Switch from the app to clear the data I entered (such as ID and DOB while I switched to gmail to get my registration code). I don't like it, but I think it's a security thing. iOS 13.3 iPhone XS by Erubesco on 2019/11/27 05:40 Great Works by BONNIE ♡ 2019/11/16 17:33 Your screwed if you forget all your other information Or if you get a new phone from Jimmysd on 2019/10/27 17:43 I hate this company only by Vyt0rSFC on 2019/09/20 00:39 I did not uninstall the app or remove it from my account. I just updated for iOS 13 and was still able to use the app and log in. By Deku Scrub0 on 2019/08/11 20:29 When I changed phones, I followed directions and worked fine. Like, people can't follow simple instructions. By Brese29 on 2019/08/04 19:39 The approval button is off-screen making it impossible to use on the iPhone X, XR, XS, etc. by wishyjeosnxjrisnx on 2019/08/04 03:30 this is the stupidest thing that has to go through many things just to log into my own account. This should be an option to get a secondary password, not a mandatory one. Also the instructions could have been clearer. All I was trying to play was final fantasy. You would have thought I was applying for a government position by radloot on 2019/06/08 07:34 UPDATE: Now 5 stars since updated! Yay! And still doing exactly what to do! Previous: _____ does what needs to be done: provide 2FA for your box account. The design is old (not updated two years ago), but it works well. Based on the lack of updates, it would be great to see them move to Authy. But I imagine they must be committed to this app because it is a vital part of the Swuare account. All in all I don't really have any complaints because it works! A design update would be welcome though. By urFtrStpDad on 2019/06/08 04:37 The only thing I need to mention is how to accept a user agreement as a button for an unclear acceptance. In order to accept a user agreement you need to click [Accept] but this is displayed only as 'text' in the head on the far left side. I think they really need to make an actual button button that stands out and it seems to be the model button that all other applications use. By surake41 on 2019/06/06 13:53 works as I expect my account remains secure. I couldn't ask much more. Be sure to type the emergency removal code and serial number. By lan13120 on 2019/06/03 16:02 The app has all it needs to apply a one-time password, which is fairly clear to set up. I was kinda worried after seeing bad reviews, but after using the app I'm sure these people are just incredibly stupid. By zzSuperman on 2019/05/12 10:43 no button to accept EULA. Good job. By krownmedkyng on 2019/05/11 18:53 because of being far from FFXIV for years I can not get my account again because of a password once I can not access it without a registration password that I no longer have and I do not have emergency password removal, customer support is terrible and I can not send an email to them because the site does not work! If I could rate this in negative I would. By zengoldabil on 2019/03/27 18:47 I am studying an iOS developer and can already make the app more intuitive and easier to use the app than this. 1) The app obviously has not been tested on all current screen formats for Apple devices. My phone model was released in 2018 and is now 2019 but I had to click around to get a hidden acceptance button that appears either invisible or off-screen somewhere on the top left. 2) When I turned to email to grab the registry code and turned back to this app, instead of cached my account information I had already entered and let me continue to lose what I had entered and I had to enter all over again. 3) Don't put a picture of why the quality ignoring box on the app that is central to encouraging them to account security is beyond me. But a lot of the world doesn't make sense to me so this is an equal course. By Kurzama on 2019/02/24 22:46 There are no issues at this time. 2-24-19 by Tensi7 on 2019/02/14 15:24 it keeps reset and disabled itself. Happens at least once a week by krazzei on 2019/01/30 16:38 the app has not been updated in 2 years and they have not made their user interface scalable... The terms cannot be accepted because the button does not appear on the screen. I really like to secure my ff14 account without having to buy a physical token generator. By jacoblnfsty on 2019/01/14 15:16 I like the Apple Watch part though to pull up the token by Ake.P on 2019/01/08 03:01 When is the full screen updated? By Linuxpng on 2018/12/29 04:17 First there is no acceptance button. The second that #39 can not hide the keyboard to put it in a special code. The third this app is the size of the iPhone around 2007. Please update this. By EllyMay808 on 2018/12/14 02:11 It's ridiculous that we have to do it but I managed to find an acceptance/compatibility button on the latest iPhone screen. If you press around at the corners of the screen you will eventually reach even though you can't see them. Mine recorded when you tapping in the upper left corner but feel free to try them all if it doesn't work. As I said, it's silly but at least you'll be able to use the app they seem reluctant to fix. By Arislan on 2018/12/13 16:46 I ' used this on Android for ages, but I can't #39 even find a way to accept terms on my iPhone XS Max. I'm not sure if #39 screen layout or what, but The app is completely unusable. By GrandMoffJames on 2018/12/11 17:21 Can't even get past the first screen and compact. By Tromadxiv on 2018/11/22 20:34 you have to read these long terms of service document, but after there is no way to approve it so you can not log on to the token. Kind of makes it difficult to log in. By Kyle1278 on 2018/11/17 13:38 This app needs to be updated severely. You cannot bypass the user agreement. By Sephimaru on 2018/10/30 01:49 I try to register a final fantasy account 14. I have followed the steps needed for millions more to play this stupid game but this is where this effort ends because of the use of this application you need to accept the user agreement... However, there is no approval button. I have no idea how they thought this was acceptable but because there is no button that allows you to accept a user agreement it is literally impossible to go further. I saw some reviews saying you can do it on devices with different screen sizes but you can't. I tried three different devices of different sizes, and it doesn't matter, the button is not simply off-screen it doesn't exist. So the latest stunning achievement from the company that made it the worst single video game of all time; by Quentin Biles on 2018/04/13 21:03 I can't even get past the screen to accept the terms. Garbage. By jtf323 on 2018/02/13 02:42 I hope they will only use Google Authentication / Authy, it will be easier for users and devs. I stopped playing FFXIV for a moment, and when I decided to come back I opened the authenticator and it was like that i forgot all my information so I had to go through using password removal etc. Not a huge deal but it was a nuisance that could have been prevented only by using industry standards already there. By Genvik3fka on 2017/11/15 04:39 If you read the instructions when setting up your password once then this app works great. Just make sure you save your emergency password to remove a safe place as you will need it if you change phones. By logecho on 2017/11/12 20:50 Why do I need to manage a symbolic application for each game? Use industry standard and save your devs time. Waste app and registration process are complex with what feels like ten different areas. By SJ-yama on 2017/08/05 01:10 This app is ' beautiful or anything, but it works well. As others have said, the acceptance button for terms of service is in the upper left corner. Click on the word #34, accept.#34;... By Shogundogan on 2017/07/20 19:36 I got locked because I got a new phone by a former Kik lover on 2017/07/04 1 frankly don't waste your time by Completedooodoo on 2017/06/22 00:35 Admission slot is the acceptance button at the top left. Who cares if this app #39; T-sizing for newer avons? It's just a symbolic app. By ldk + idc!!! On 2017/05/20 15:37 Where #39'#34;I agree #34; Button I don't #39;I don't see it by Rod Smash on 2017/03/05 17:46 it took me some time to figure out, but the acceptance button is actually on top left where he says accept. By Czanrei on 2017/02/20 03:49 I can not even accept the terms of service because the Devers did not #39; By Jm825 in 2017/02/12 23:09 unable to accept the terms of service on iPhone 7. By Namesertin on 2017/01/26 16:21 is unable to accept a license agreement on iPhone 6S+. Unable to set up and use. Why even bother with the app release if you don't #39;t you have QA? Expect the best of a big company like a box. Shame on you by gravenknight666 on 2017/01/14 11:31 Just use the app before it is updated or your operating system should work fine hell i've #39; T had many problems with her in. All ps stop voting down this thing down for stupid reasons if you can #39 t know how to use it call their support, if you don't #39 #39; Your new phone is #39 #39 War_Dog_47 #39 #39; I just bought a new phone and has no problem at all using this app on it, mostly because I know how to listen. By Mike_bars89 on 2017/01/01 07:08 the most confusing account ever developed by xXCrimson5557Xx on 2016/12/25 21:01 All enix games square is great so get the wrong picture if you #39 re-re-them and read this review, but this app is just uncomfortable ... Every time you get a new phone or just delete the app (whatever it may be) you will have pretty much to call your customer support once your password is recovered or reset... It is very funny as every time I hear someone call customer support they always know exactly what people call ☹ by Mysticmint on 2016/12/24 04:28 I can #39 not accept the terms of service to start the screen too low !!!! By PuntThePikachu on 2016/12/16 07:12 Do exactly what it says on the
